PROFESSIONAL SUMMARY

Master's student in Supply Chain and Operations Management at Jönköping University with 1.5+ years of engineering experience in manufacturing operations, procurement, and inventory control. Proven track record of operational impact, achieving a 22% increase in output, a 18% reduction in defects, and 95% on-time delivery using Lean Six Sigma (DMAIC) and TQM frameworks. Experienced in ERP/WMS systems (SAP S/4HANA, Jeeves) and warehouse optimisation across 51,000 m². Certified in Lean Six Sigma and AI Fluency, targeting supply chain and procurement roles across Sweden.

TECHNICAL SKILLS

Operations & Supply Chain: Procurement, Total Quality Management (TQM), Inventory Management, Material Requirements Planning (MRP), Supplier Coordination, Quality Assurance, Socio-Technical Systems (STS).

Frameworks & Methods: Lean Six Sigma (DMAIC), Value Stream Mapping (VSM), FMEA, 5S, SIPOC, Root Cause Analysis (Fishbone, 5-Why), Pareto Analysis.

Software & Data Tools: SAP S/4HANA (Essential Training), Jeeves ERP/WMS, Minitab, MS Office (Advanced Excel, Pivot Tables), SolidWorks, CAD, Fusion 360

WORK EXPERIENCE

Assistant Production Engineer - *P.V. Engineering, Chennai, India* Jul 2022 – Dec 2023

- Maintained 98% stock availability across 20+ active SKUs by managing inventory levels and material tracking, preventing production bottlenecks for automotive braking lines.
- Negotiated with material suppliers and coordinated daily workshop operations across sales, quality, and engineering teams to meet strict micro-tolerance requirements, achieving a 95% on-time delivery rate.
- Increased daily output by 22% and reduced component defects by 18% by optimising floor operations, production schedules, and machine allocations.
- Supported development and launch of 5 high-precision braking product lines (including calliper pistons and plungers), ensuring 100% compliance with quality and safety standards.

MASTER'S PROJECTS

Six Sigma DMAIC - Assembly Line Efficiency Improvement - *Qtech Group, Anderstorp* Sep - Dec 2025

- Applied full DMAIC methodology, identifying 28.7% non-value-added time via VSM across 8 modules; targeted a 20% reduction in assembly time (45 → 36 min/module).
- Diagnosed root causes using Pareto, Fishbone, and 5-Why analysis; designed a POUS and 5S layout to cut part-searching delay, the top contributor at 30.9% of total delay.

AI & WMS Integration - Socio-Technical Transformation - *Gripen Wheels AB* Jan - May 2025

- Analysed warehouse operations across 51,000 m² using the STS framework, identifying inefficiencies in floating bin storage and underutilised ERP.
- Designed a 3-phase AI-driven WMS roadmap projecting 99% inventory accuracy and 20% space utilisation improvement.

EDUCATION

M.Sc. Supply Chain Operations Management - Jönköping University, Sweden Aug 2024 - May 2026

B.Eng. Mechanical Engineering - Jeppiaar Engineering College, Chennai, India Jun 2018 - Apr 2022

CERTIFICATIONS

- Lean Six Sigma Green Belt, AI Fluency for Students, SAP S/4HANA Essential Training
